

SUNNY KUMAR

Software Development Engineer – I | Frontend Developer

Patna, Bihar, India | +91-7257941828 | sunnykumar91728@gmail.com

Portfolio: sunnykumar-devhub.vercel.app | GitHub: github.com/sunnykumar-devhub | LinkedIn: linkedin.com/in/sunnykumar-devhub

PROFESSIONAL SUMMARY

Frontend Developer (SDE-I) with 2+ years at Codebucket Solutions, including a 9-month internship, building React.js and Next.js applications across MarTech, EdTech and GovTech domains. Delivered frontend features for 4 production enterprise applications: role-based dashboards, multi-step workflows, payment integrations (Razorpay, Cashfree), secure authentication and real-time features. Strong in state management with Redux Toolkit and RTK Query, reusable component architecture and frontend performance, working with cross-functional teams in Agile.

TECHNICAL SKILLS

Frontend	React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Vite, React Router DOM, React Hooks, Component-Based Architecture
State Management	Redux Toolkit, RTK Query, React Query, Context API
API Integration	REST APIs, Axios, JWT Authentication, API Caching, Error Handling, Payment Gateways (Razorpay, Cashfree)
Styling	Material UI, Tailwind CSS, SCSS Modules, Flowbite React
Forms & Validation	Formik, React Hook Form, Yup, Zod
Real-Time	Socket.IO (real-time chat and notifications)
Practices	Agile (Scrum), RBAC, Protected Routes, Reusable Components, Responsive Design, Cross-Browser Compatibility, Code Splitting, Lazy Loading, Performance Optimization
Tools	Git, GitHub, GitLab, Jira, Postman, VS Code

PROFESSIONAL EXPERIENCE

Codebucket Solutions Private Limited	June 2025 – Present
Software Development Engineer – I (Frontend Developer)	Patna, Bihar

- Implemented global state management with Redux Toolkit and RTK Query across 4 enterprise applications, handling authentication, dashboard data, API caching and server state across multiple modules
- Designed reusable UI components with Material UI, Tailwind CSS and SCSS Modules, establishing component standards that improved consistency and reduced code duplication across projects
- Integrated payment systems (Razorpay, Cashfree) and REST APIs using Axios and RTK Query, with error handling, loading states and secure authentication token management
- Optimized frontend performance with code splitting, lazy loading and memoization, improving dashboard responsiveness for large datasets
- Collaborated with backend engineers, QA and product stakeholders in Agile sprints to ship production-ready features and resolve production issues promptly
- Mentored interns on React best practices, component architecture and code standards through code reviews and pair programming

Codebucket Solutions Private Limited	September 2024 – May 2025
Frontend Developer (Internship)	Patna, Bihar

- Developed responsive React.js components and integrated REST APIs using Axios and project-specific state management
- Built authentication workflows with JWT tokens and role-based protected routes across multiple applications
- Implemented form validation with Formik, Yup and Zod for multi-step application workflows
- Collaborated with senior developers on debugging, feature implementation and code reviews; promoted to Software Development Engineer – I

PROJECTS

Influency Dashboard	Enterprise MarTech SaaS Platform
Influencer marketing platform connecting Brands, Influencers and Admins for campaign management, creator discovery, content approval, payments via Cashfree and real-time communication.	
Developed role-based dashboards for Brands to create campaigns, Influencers to track proposals and Admins to monitor platform operations, with tailored permissions per role	

- Architected state management with Redux Toolkit and RTK Query, using RTK Query caching and automated cache invalidation to reduce redundant network calls
- Implemented JWT-based authentication with protected routes restricting access by user role across all modules
- Integrated the Cashfree payment gateway with error handling and payment status tracking
- Built reusable UI components and integrated Socket.IO for real-time chat between Brands and Influencers
- Improved dashboard performance with lazy loading, memoization and optimized rendering for large campaign datasets

Environment: React.js • Vite • Redux Toolkit • RTK Query • React Router DOM • Axios • Material UI • SCSS Modules • Formik • Yup • Socket.IO • Cashfree

Education Connect

Learning Management System (LMS)

Role-based LMS serving Students, Mentors, School Admins and Platform Admins with secure learning content, subscriptions and institutional analytics.

- Designed modular dashboards for 4 distinct user roles with customized navigation, permissions and analytics
- Developed a secure PDF viewer and video streaming interface for protected learning content with progressive loading
- Implemented OTP-based authentication with automatic token renewal, keeping sessions active without forced re-login
- Built subscription management with plan selection, payment processing and usage tracking for institutions

Environment: React.js • Vite • Redux Toolkit • RTK Query • Tailwind CSS • Formik • Yup

Bihar Sanskrit Shiksha Board (BSSB) Portal

Government Education Management System

Government education platform built with Next.js for institute registration, student enrollment, document verification, Razorpay payments and board administration.

- Built multi-step registration workflows using Formik with conditional validation for institute and student registration
- Developed document upload and verification interfaces with file previews and pre-submission validation
- Implemented role-based access control separating Board Administrator and Institute-level permissions
- Integrated the Razorpay payment gateway with invoice generation and transaction history tracking
- Integrated REST APIs with RTK Query and Axios, and built Excel export for administrative reporting

Environment: Next.js • React.js • Redux Toolkit • RTK Query • Axios • Material UI • SCSS Modules • Formik • Yup • XLSX • Razorpay

Bhumi Rupantaran (Land Conversion Management Portal)

Government Land Conversion System

Government platform digitizing land-use conversion applications for citizens and land revenue officials, replacing manual paper-based processes.

- Designed a multi-step land conversion wizard with Zod-based validation across land, property and applicant sections
- Built dual interfaces for citizens to track application status and for officers to manage approvals and generate reports
- Implemented Redux Toolkit state management for workflows, dashboards and reporting, with server-side pagination and filtering over 100K+ application records
- Engineered shared components (status badges, search filters, data tables) used across citizen and officer interfaces

Environment: React.js • Vite • Redux Toolkit • Axios • Material UI • SCSS Modules • Zod

Also built: Abhiyan Basera Public Portal (sole frontend owner, UI through API integration) • Sujan Singh Investment Advisory website (Next.js)

EDUCATION

Presidency College, Bengaluru | Bengaluru City University

Bachelor of Computer Applications (BCA)

2021 – 2024

CGPA: 8.2/10
